printpod

Campus partnership proposal

Self-service printing for your campus

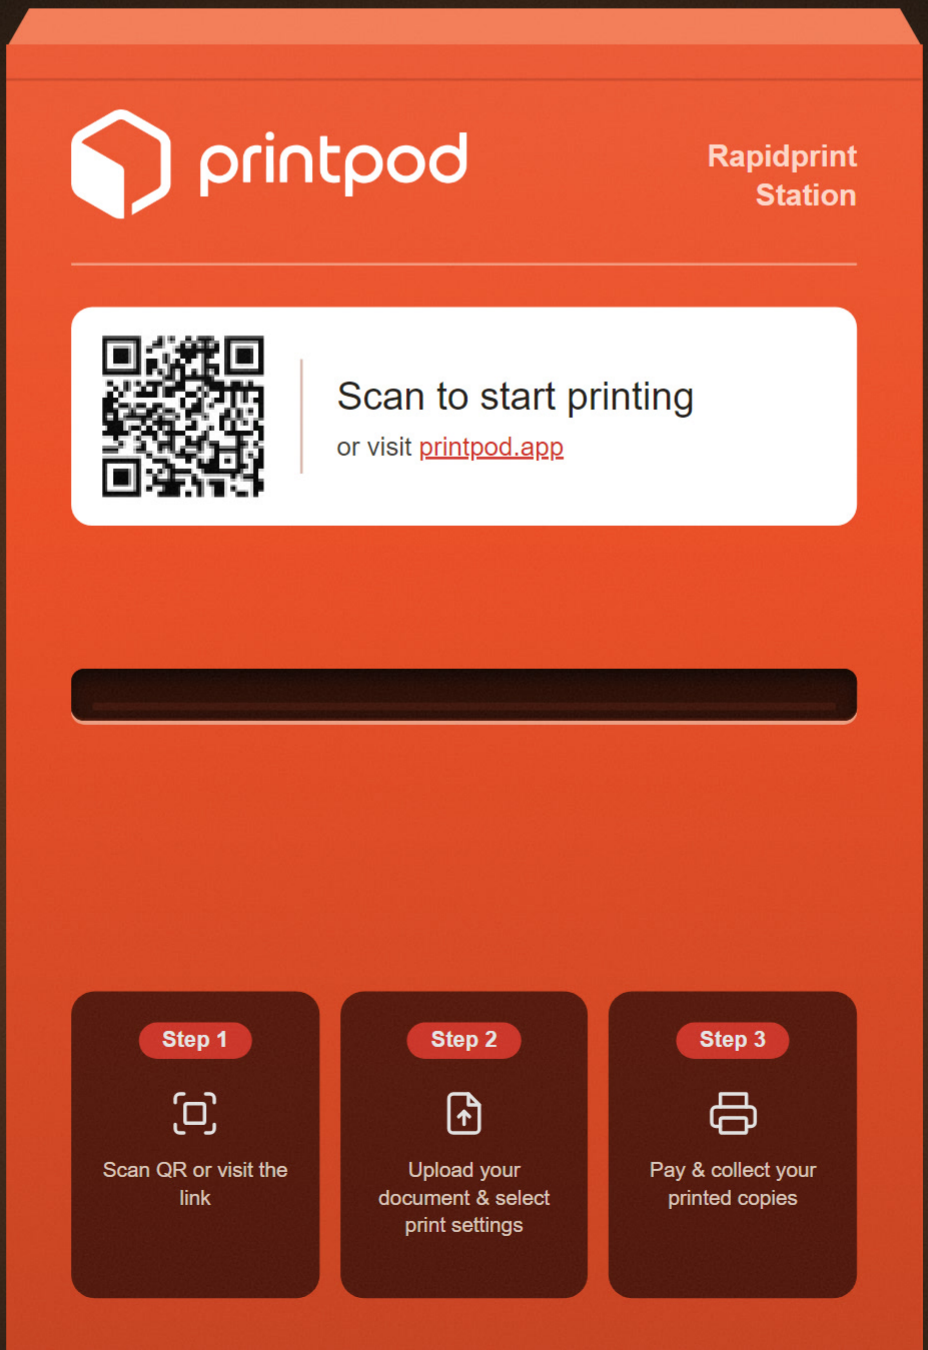
A PrintPod RapidPrint Station that runs without an operator, installed at no cost to your university.

< 30 s
from QR scan to printed copies

0 Tk
setup and running cost to the university

10%
of every page paid to the university

0
operators needed to run the station



Our proposal

We would like to install a PrintPod RapidPrint Station, a self-service printing kiosk, in a busy area of your campus. Students print straight from their phones, PrintPod supplies and maintains the station, and your university earns a share of every page.

Faster for students

No queue and no file to send to anyone. Students print between classes.

Private by design

Documents go from the student's phone to the printer. No one else handles them.

No operator needed

Students upload, pay and print on their own. No one has to run the station.

How students print

Scanning the QR code on the station opens printpod.app in the phone's browser. There is no app to install.

01

Scan

Scan the QR code on the station with any phone camera.

02

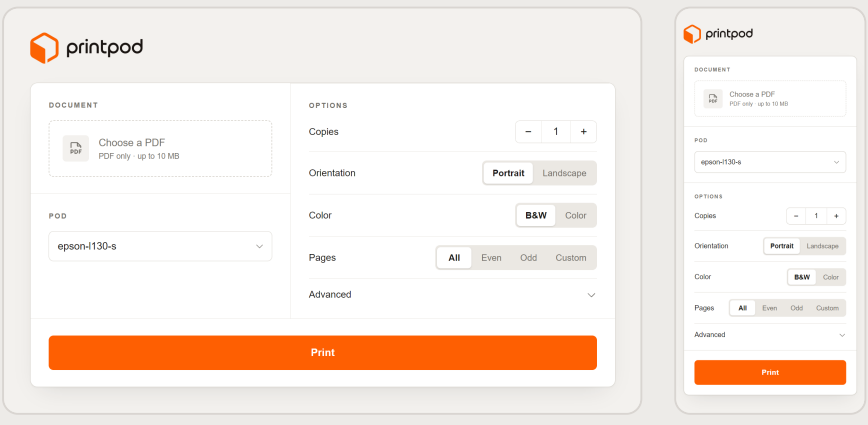
Upload and set up

Choose copies, orientation, colour and pages on screen.

03

Pay and collect

Pay for the pages and collect the copies from the station.



What the university gains

A new student service that runs itself, with revenue from the first page printed.

A service that runs itself

PrintPod handles the equipment, supplies and repairs, so there is nothing to buy and no one to hire.

Revenue on every page

A fixed share of every page printed is paid to the university.

A visible first

Few campuses in Bangladesh have one, so early adopters are likely to draw press attention.

Students stay on campus

Fewer trips to outside print shops between classes.

Better for students than a print shop

Students skip the operator, the queue and the file transfer.

	Print shop Operator-run	printpod RapidPrint Station
Time per job	**2–5 min** often longer	**< 30 s** scan to printed copies
Sending the file	× Pen drive, email or WhatsApp	**From the student's own phone**
Privacy	× A copy stays with the operator	**No one else sees the file**
Print settings	× Explained to the operator	**Chosen on screen**
Waiting	× Queue behind others	**No queue**
Location	× Often off campus	**On campus, near classes**
Price	× Varies by shop	**Fixed, shown upfront**

The RapidPrint Station

A freestanding unit about the size of a small vending machine, with step-by-step instructions printed on its front so first-time users can print without help.

Printing	Paper	Size	Operation	Students need
B&W and colour	200 sheets per load	22 × 15 × 32 in	No operator needed	Any smartphone

Partnership terms

Students pay per page for single-sided prints. The university receives 10% of each payment, and we are open to discussing a higher share.

Black and white		Colour	
5 Tk per page	**0.50 Tk** to the university	**10 Tk** per page	**1.00 Tk** to the university

Example. A student prints 10 black and white pages and pays 50 Tk, of which 5 Tk goes to the university.

Yearly earnings from one station

UP TO

144,000 Tk

a year at 800 pages a day, or 12,000 Tk a month

Black and white pages, 30 days a month. 800 pages is four paper loads. Colour earns double.

Who does what

PrintPod handles

Everything needed to run the station

- **The station** — Installed, maintained and repaired
- **Software and payments** — Printing page, payments and queue
- **Paper and ink** — Supplied and refilled by PrintPod

Your university provides

Space, power and a caretaker

- **Floor space** — A busy, accessible spot on campus
- **Power** — A standard outlet, up to 100 W
- **A caretaker** — Checks the station and loads paper

Next steps

1. **Meeting**
   We present the station, answer your questions and choose the location with you.
2. **Agreement**
   We confirm the revenue share and the caretaker arrangement.
3. **Installation**
   Our team installs and tests the station.
4. **Launch**
   Students are told the station is open.
